

STYLWALL® II FLUTED WALL SYSTEM

Create striking visual effects to distinguish your building's exterior.

The StylWall® II Fluted wall system combines striking visual effects with installation ease, making it an extremely popular choice for a wide variety of building applications. The system also features concealed fasteners to further enhance its smooth, clean beauty.

Choose the StylWall II Fluted wall system to add distinctive beauty in new or retrofit applications such as corporate offices, manufacturing plants, and other industrial applications.

DISTINGUISH THE LOOK

The StylWall II Fluted wall system features an attractive ribbed design that creates dramatic shadow effects on the exterior of a building.

The panel surface is embossed—providing a rich, consistent appearance.

INSTALLATION

Each panel of the StylWall II Fluted system is positioned perfectly by nesting against the previous panel, hiding the joint deep within the recess of the box ribbed design. The hidden fasteners also improve the building's security. A variety of attractive, thermally efficient doors

and windows is available with factory-cut panel openings for easy installation as well.

ADD ENERGY EFFICIENCY

StylWall II Fluted panels can be easily insulated with a wide variety of insulation systems—batt, blanket, or rigid board—to greatly enhance the energy efficiency of your building.

DESIGN FLEXIBILITY

Factory-fabricated transition materials enable you to combine the StylWall system with other Butler® wall systems, as well as conventional materials.

Additionally, the 16-inch panel width, combined with the side "return leg," means almost any conventional material can be easily fastened to the interior of the wall system.

ENHANCE THE BEAUTY AND DURABILITY

All StylWall II panels feature the high-quality Butler-Cote™ premium finish. Made with a 70% Kynar 500® or Hylar 5000® resin, this incredibly durable coating includes a 25-year warranty against fading and chalking.

STYLWALL® II FLUTED WALL SYSTEM

The special joint design lets each new panel “snap” easily into place against the previously installed panel.

KEY BENEFITS

- ✓ Ribbed panel design creates dramatic shadow effects
- ✓ Concealed fasteners provide monolithic look and added security
- ✓ Smooth, clean exterior embossed appearance
- ✓ Special joint design on panel for simple and secure installation
- ✓ Factory-fabricated transition materials to create design versatility
- ✓ Butler-Cote™ finish system warranted for 25 years against fading and chalking
- ✓ Available in a wide variety of “cool” colors all with an SRI of 29 or greater.
